CORPORATE PROFILE

Brief History:

Aladdin Sports Co. began its journey in 2015 as a small-scale, proprietorship business specializing in sports balls. Over the years, we've expanded our portfolio to include sportswear, accessories, and gloves. Our commitment to quality has earned us recognition as a trusted supplier of sports balls, sportswear, gloves and accessories.

Milestones:

- 2015: Launched sports ball division, producing high-quality, customized soccer/footballs for training, semi-professional, and top-level matches.
 - 2017: Introduced sportswear division, offering bespoke dyed and sublimated clothing, along with imports from various countries.
 - 2019: Expanded to sports gloves, manufacturing customized gloves for cycling BMX, MTB, winter sports, goalkeeping and more.
- Today, Aladdin Sports Co. is a respected name in the industry, known for our dedication to quality and customer satisfaction.

Production Process:

Our ball production process is standardized and is based on quality consciousness. We regularly update our machines and processes in our production to stay ahead of all our competitors. At the moment, the most modern machines are used for producing balls. Besides that, we have state of the art equipment in our R&D Lab for material testing and new developments.

Mission Statement:

Aladdin Sports Co. will continue its endeavors to supply top quality sports products to its customers serving them with utmost honesty, commitment and reliability in alignment with TQM and Lean Production Principles.

Vision Statement:

The management of Aladdin Sports has a vision to become one of the market leaders of superior quality sports goods producers in the world by using the core values of honesty, trust, commitment and reliability.

Quality Control System:

We have applied four tier quality assurance systems in our entire production operations at AQL 1.0 which ensures about 100% compliance of the international quality standards. This system comprises the following 4 main steps:

- I. Incoming material inspection
- ii. Inline quality control
- iii. Final production quality control
- iv. Pre-shipment inspections

R&D / Innovation:

A team of highly skilled technicians, who have a vast experience of product development, keeps on making research & development work to produce new and innovative products. Our R&D Lab is equipped with state of the art machines and testing equipment. Strong R&D capabilities with innovative ideas, following modern trends and technologies, are our hallmarks. We believe in complete customer satisfaction. Being an OEM, we also offer product development services catering to the specific needs and requirements of our valued customers.
